

Technical Evaluation Task

Task Description: Create a web application for online shopping.

Objective: The objective of this task is to assess the candidate's proficiency in programming and application creating skills and we will evaluate Design pattern, clean code, Error handling, Functionality, UX.

Deliverables

1. A web application with below uses cases.:
 - List the Product (Include Name, Description, Price, Discount, and you can add additional fields)
 - Customer can add and remove the product.

Logic: Discount should apply automatically while adding product, the cap should also validate (You can fix the cap , ex: if total amount above 5000 only give the discount, below 5000 no discount like that).

- Show the Purchase Summary

Time Limit: Max 2 days.

Technology

Framework: .NET Core MVC

Database: SQL Server (ADO .NET / EF)
